Hiring Manager

Oracle Morocco R&D Center

Casablanca, Morocco

Subject: Application for Research Assistant - PFE 2026 Internship (Job ID: 284745)

Dear Hiring Manager,

I am thrilled to apply for the Research Assistant - PFE 2026 internship at Oracle Morocco R&D Center (Job ID: 284745). As a 4th-year IT Engineering student at SUPMTI, with hands-on experience in ReactJS, Spring Boot, and Django, complemented by self-directed learning in Python and database management, I am eager to contribute to Oracle's innovative cloud solutions and cutting-edge technology projects.

At SUPMTI, I have developed a strong foundation in software development, networking, and system design through coursework and projects, including a Django-based data management dashboard for Company X, utilizing Git and Docker for secure collaboration. Through self-directed learning, I have mastered additional skills in Python, SQL, and web development via platforms like Coursera, applying them to build a portfolio platform using Spring Boot and ReactJS. These experiences have honed my ability to tackle complex technical challenges, aligning with Oracle's mission to drive

innovation.

I am particularly inspired by Oracle's leadership in cloud solutions and commitment to fostering inclusive, diverse teams. My technical expertise, proactive learning approach, and fluency in English position me to collaborate effectively with industry experts and contribute to real Oracle products during this internship.

Thank you for considering my application. I am enthusiastic about the opportunity to join Oracle Morocco R&D Center and would welcome the chance to discuss how my skills and passion align with your team's goals. I am available for an interview at your convenience.

Sincerely,

Tarek BEKKAOUI
