Summary

IT Engineering student with hands-on experience developing applications using ReactJS, Spring Boot, and PHP, including stock management and healthcare systems. Skilled in collaborating with teams and clients to deliver user-focused solutions that enhance efficiency. Actively advancing expertise in Spring Boot and Laravel, I am eager to contribute to innovative, scalable software projects across platforms.

Experience

Ongoing - 2025

Software Developer Student
Personal Projects

- Developed a full-stack application with ReactJS and Spring Boot, integrating APIs for scalability.
- Developed a Django-based website with a data management dashboard for Company X using Git and Docker for secure collaboration.
- ReactJS/SCSS portfolio ensuring responsive design and performance.

Jan 2023 - May 2023

Software Developer Intern
Mohammed VI University Hospital Center

Built two web applications using HTML, CSS, JavaScript, and PHP:

- Pharmacy stock management system
- Healthcare questionnaire app

Dec 2022 - Dec 2022

Software Developer Intern
COLAIMO - Dairy cooperative Morocco Oriental

Built a C# desktop app for trainee management :

- Designed a user-friendly interface for adding, editing, and deleting trainee records.
- Implemented data storage using SQL Server.
